

REACH DECLARATION AUGUST 2024

IC Blue LTD is an independent distributor of electronic components and is classified as an importer or distributor of "articles" as defined in REACH Article 3(3).

This statement reflects IC Blue LTD's understanding of the applicability of European Union Regulation (EC) No. 1907/2006 of the European Parliament and of the Council of 18 December 2006, concerning the Registration, Evaluation, Authorisation, and Restriction of Chemicals (REACH), as amended, to IC Blue LTD's operations. Additionally, it covers the applicability of the UK REACH Regulation, which is retained EU law as amended and supplemented by UK legislation.

IC Blue LTD does not manufacture any of the components it sells and does not add any chemicals during the handling process. IC Blue LTD's business practice is solely in the distribution of electronic components. Products sold by IC Blue LTD are "articles" as defined in REACH Article 3(3). There is no intended release of substances from the products under normal or reasonably foreseeable conditions of use; therefore, the requirement in REACH Article 7(1)(b) to register substances contained in articles and intended to be released under normal or reasonably foreseeable conditions of use does not apply.

Chemicals used in the components, or the manufacturing of components sold by IC Blue LTD are used at the discretion of the manufacturer, and the relevant requirements of the REACH Regulation remain the responsibility of the manufacturer.

IC Blue LTD will continually monitor the situation and act accordingly to any changes in legislation, including updates to the Candidate List of Substances of Very High Concern (SVHC) and any new restrictions or authorisation requirements in both the EU and the UK.
