

RoHS/WEEE COMPLIANCE STATEMENT

IC Blue Ltd is committed to complying with all relevant environmental regulations, including the Restriction of Hazardous Substances (RoHS) Directive 2011/65/EU and its amendments (RoHS 2 and RoHS 3), as well as the Waste Electrical and Electronic Equipment (WEEE) Directive 2012/19/EU.

We have carefully reviewed our processes to ensure we can assist our customers in meeting their obligations under these directives.

We are committed to sourcing products that meet the precise specifications provided by our customers. When selecting electronic components, customers should verify their requirements and confirm the compliance of specific parts directly with the component manufacturer. We will endeavour to assist with any necessary fact finding in order to supply the product required.

We cannot certify or declare the chemical properties of resale components concerning RoHS or WEEE compliance. The responsibility for such declarations lies with the original component manufacturers.

Where possible, we will display the RoHS status on quotes, delivery notes and invoices. RoHS status information is based solely on information provided to us by the manufacturer, manufacturers' distributor or via our supply chain. We are not responsible for the accuracy of this information.
